

Jungle Safari

Jungle Animal Facts

1. Herpetology is the study of amphibians and reptiles.
2. Beetles taste like apples
3. For every person in the world there are 1 million ants.
4. Most amphibians experience some level of metamorphosis as they enter their adult age.
5. Western toads are considered the gardener's friend because they eat common garden pests like insects and slugs.
6. You cannot get warts from toads.
7. Reptiles are the oldest type of animal on the planet.
8. The Australian Bearded Dragon communicates with other Bearded Dragons by bobbing its head and waving.
9. Some lizards will separate their tail from their body when attacked. The tail is left behind wiggling to confuse the attacker.
10. Female Red Tailed Boa constructors incubate eggs inside their bodies and give birth up to 60 live babies.
11. Reptiles depend on external sources such as the sun to maintain their body heat.
